

Final Project!

{ Python PROGRAMMING }

CodeStarters

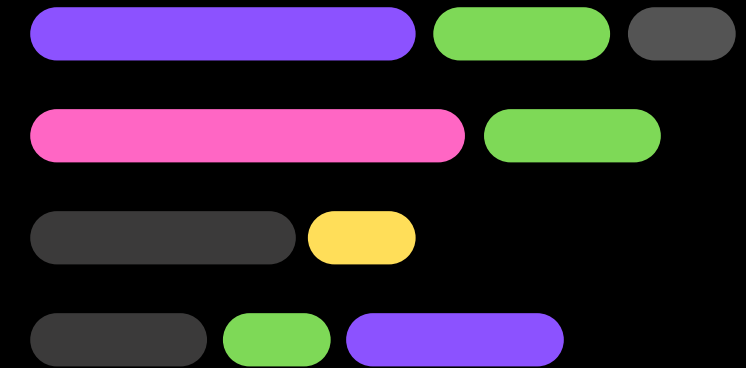

Requirements

- You have 2 minute to present to the whole class at the end
- Code have 20-40 lines of code (ready to show)
- Explain what your project is
- Present what you learned and a live demo of your project

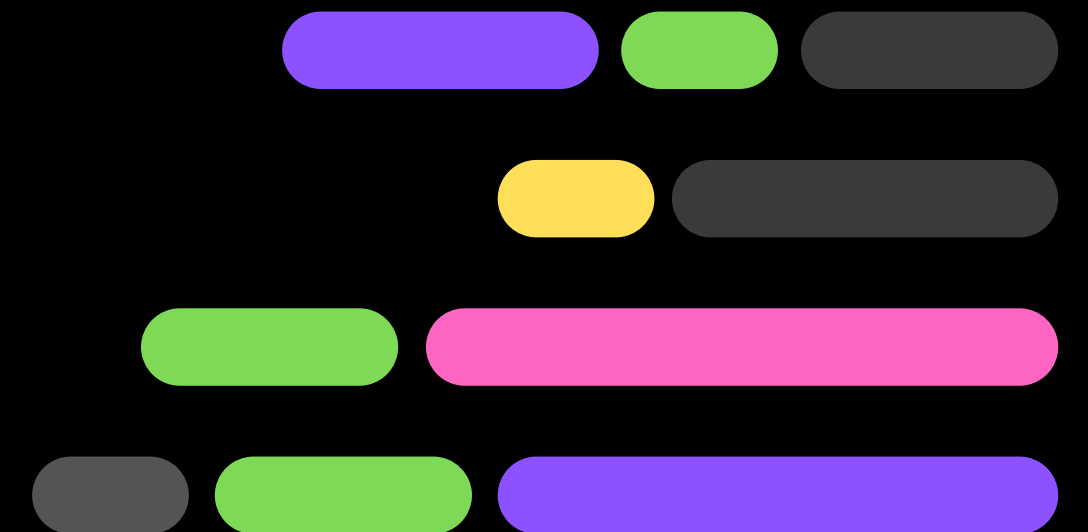

Review

Loops, Statement, Function,
Variable, List

1. Define each of the terms
2. When would you use each term?
3. What is the appropriate syntax?

Trivia Questions

1. If you set `x = 10`, and then run `x = x + 5`, what is `x`?
- a. 10
 - b. 5
 - c. 15

2. What will the following code print?

```
score = 80
if score >= 90:
    print("A")
else:
    print("B")
```

- a. A
- b. B
- c. Error

3. What will this code print?

```
numbers = [1, 2, 3]
for n in numbers:
    print(n + 1)
```

- a. 1 2 3
- b. 2 3 4
- c. 11 21 31

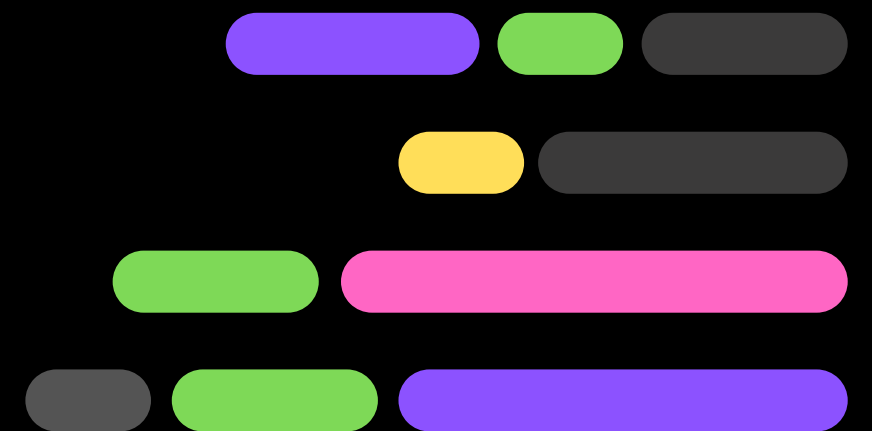

Final Project Time!

You have 45 minutes left to work on
your project

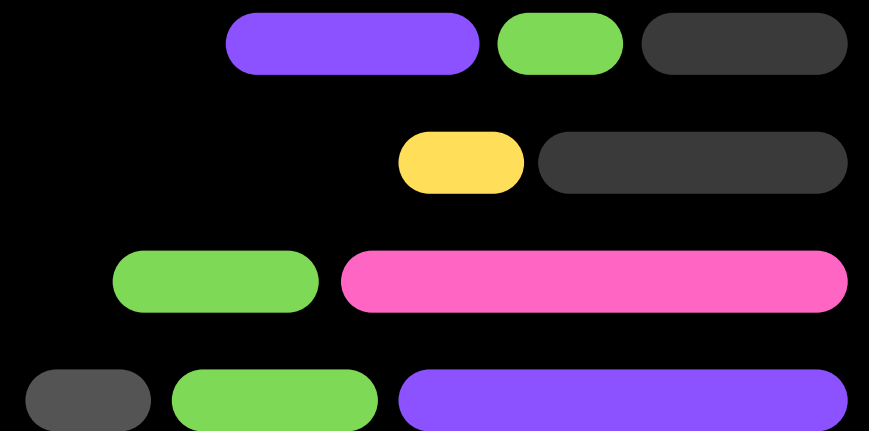

Wrap up and get ready to present!

Break

You can still work on your project
and get feedback from us!

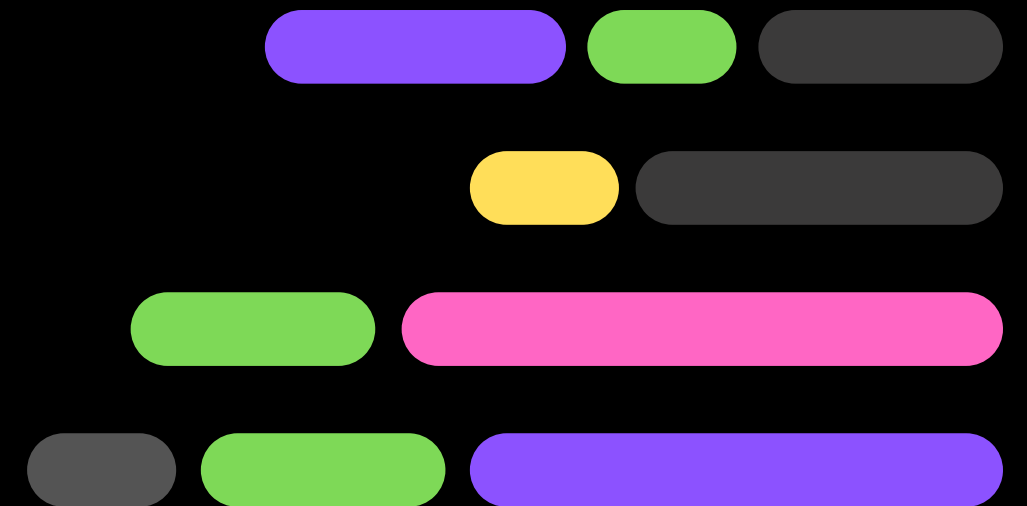

Presentation!

Projects Recap

What can you say about your projects? How did presentations go?

What we learned!

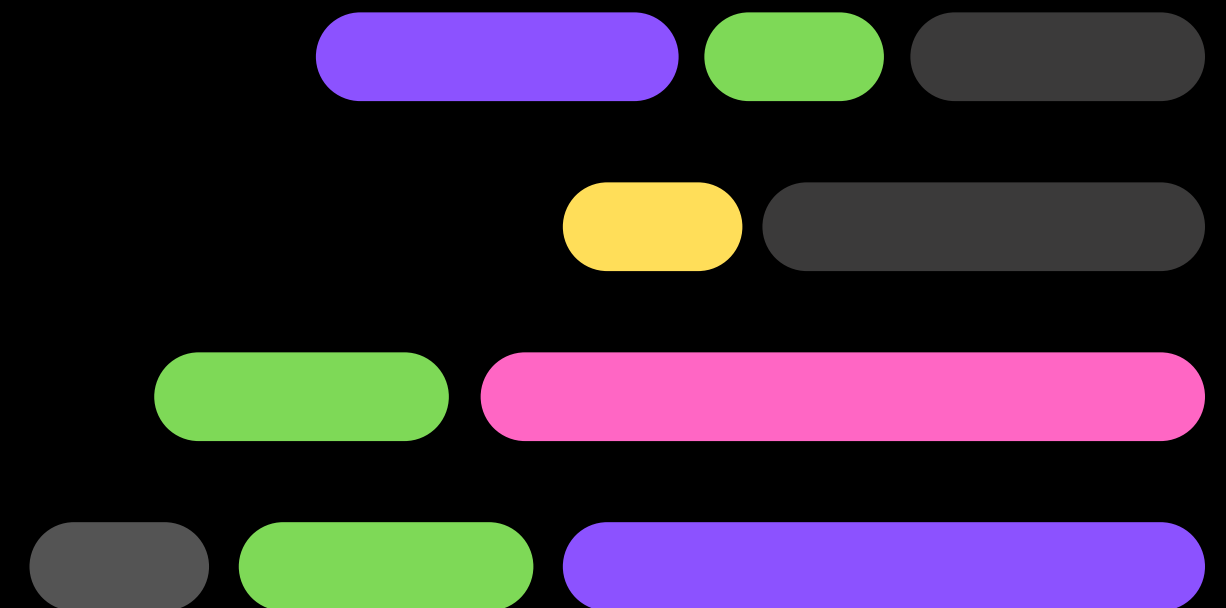

VARIABLES

Contain and store
data

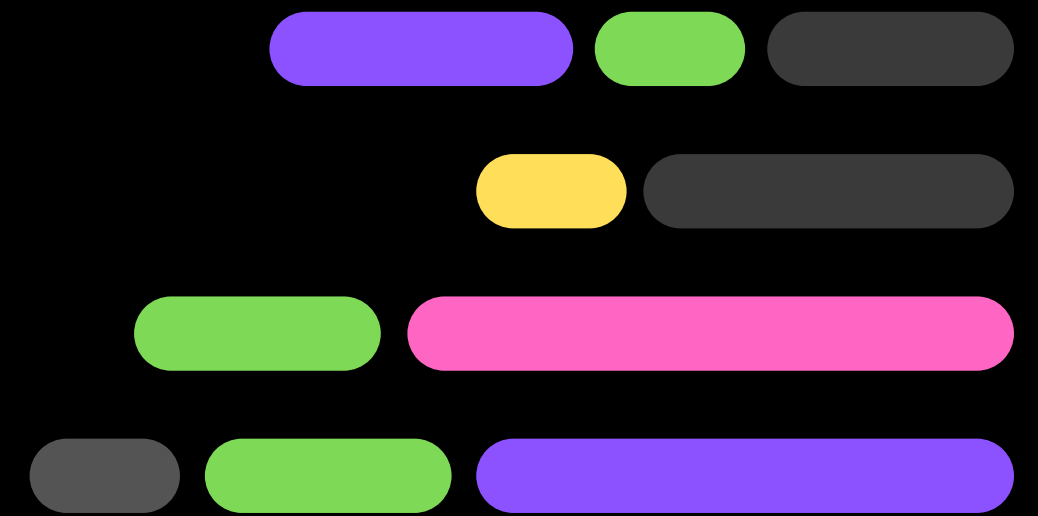

DATA TYPES

Strings
Integers
Boolean

What we learned!

Lists

Functions

Loops

THANK YOU!

Thank you for participating in our programming language workshop. We hope you found the content informative, engaging, and valuable for your learning journey.

We appreciate your active participation, insightful questions, and dedication to expanding your programming skills. Remember that learning to code is a continuous journey, and we encourage you to continue exploring, practicing, and honing your programming abilities.

If you have any further questions, feedback, or suggestions, please don't hesitate to reach out to us.

We're here to support you in your learning endeavors.

Keep coding, stay curious, and never stop learning!

Best regards,
